Saint Mary's High School , Rajkot , Gujarat
Percentage : 66.17 %

PROJECTS

- **Resource Sharing Platform**
  a project designed to empower students by providing a platform to share curated notes and study materials. Our vision was simple—By the students, For the students! However, to maintain quality and accuracy, all materials undergo a verification process by a subject mentor before being posted.

- **Product Management (CRUD)**
  Develop the product management module for the Distributor. Create forms to add, view, update, and delete product records, including fields like name, category, price, and stock. Implement input validation and use Django messages for alerts.

Achievements / Certifications

- **Certification :**
  Cloud Computing (Acmegrade)
  Python With Django (BrainyBeam)

- **Achievements :**
  2 National Level Hackathon 2024
  College Hackathon 2025
